Summary

Full Stack and Mobile Software Engineering student (GPA 7.79/10) with proven experience designing and shipping end-to-end products – from responsive Next.js and React frontends to Spring Boot REST APIs and cross-platform Flutter mobile apps. Delivered an AI-powered language learning app live in production, a full-stack e-commerce platform, and a real-time document-processing pipeline during an AI Engineer internship. Comfortable owning features across the entire stack and integrating third-party APIs and payment gateways. Seeking an internship or entry-level Full Stack or Mobile Engineer role.

Education

Ton Duc Thang University
B.Eng. in Software Engineering
GPA: 7.79 / 10

Ho Chi Minh City, Vietnam
Expected May 2026

TOEIC: Listening & Reading 935 | Speaking & Writing 310

Experience

AI Engineer Intern

Jun 2024 – Present

Amazing Tech Solutions Co., Ltd.

Ho Chi Minh City, Vietnam

- Built an image-preprocessing pipeline with OpenCV (denoising, deskew, auto-crop) that improved downstream text-extraction accuracy on a corpus of 10,000+ Vietnamese court document pages.
- Integrated PyMuPDF for concurrent text-layer extraction (4 workers), cutting per-document processing time by 60
- Designed a classification engine combining anchored regex rules and a quantised LLM that categorises Vietnamese legal PDFs into 4 document types and auto-extracts key fields (case number, signing date, issuing authority) with 95
- Refactored a notebook prototype into a maintainable Python package (config/, core/, pipeline/) with a CLI entry point, enabling reproducible runs in CI.
- Migrated LLM extraction to the Gemini API with context caching, batch processing, and dynamic Pydantic schemas, reducing API cost by 40

Projects

LUMIERE - Beauty & Cosmetics E-commerce Platform

Full Stack / Solo

Next.js 14 (TypeScript), Spring Boot 3 (Java 21), PostgreSQL, Meilisearch, Docker, Flyway, JWT, Spring Security

- Architected and solo-built a production-grade full stack e-commerce platform targeting the Vietnamese market, from database schema to responsive UI.
- Implemented stateless JWT authentication with Spring Security; database schema versioned and migrated via Flyway.
- Integrated Meilisearch for sub-50 ms full-text product search across a nested category hierarchy with multi-level filtering.
- Built a flexible promotion engine supporting coupon codes, percentage-off, and fixed-amount discount rules.
- Integrated SePay for automatic payment reconciliation via real-time webhook callbacks.

Bravelingo - AI Language Learning App

Mobile / Web

Flutter (Dart), Firebase, Gemini AI 2.5 Pro, Google STT/TTS, Agora, Bloc

- Cross-platform IELTS/TOEIC preparation app shipped to production; live at bravelingo.web.app.
- Engineered Gemini 2.5 Pro prompts to auto-score Speaking & Writing responses against official IELTS/TOEIC rubrics, eliminating the need for human graders in the MVP.
- Built a personalised study-path generator that dynamically adapts flashcard sequences and mini-game content to each learner's performance history.
- Integrated real-time voice chat via Agora SDK and automated in-app payments via VietQR and SePay.

PropTech - Real Estate Management System

Back End

Java 17, Spring Boot, Spring Cloud, MySQL, Docker, Spring Security, JWT

- Architected a microservices back end with independent services for Security, Listings, Rentals, and Sales.
- Built centralised API routing and automatic service registration using Spring Cloud Gateway and WebFlux.
- Secured all endpoints with Spring Security, Keycloak (OAuth2), and JWT-based access control.

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, Dart
- **Frameworks:** Spring Boot, Next.js (App Router), React, Flutter
- **Databases:** PostgreSQL, MySQL, Firebase Firestore
- **AI / ML:** Gemini API, OpenCV, LLM prompt engineering, Pydantic
- **DevOps:** Docker, Docker Compose, Git, GitHub, CI/CD
- **Other:** REST APIs, JWT, OAuth2, Spring Security, Meilisearch, Flyway, Firebase
